QuickPrint, by BCC Distribution, is a simple to use, turn-key, transactional barcode printing software system that integrates directly to SAP S/4HANA® & SAP ECC® software systems.

- ▶ Design, modify and maintain labels quickly and easily with the included BarTender® (WYSIWIG) software tool.
- ▶ Add nearly any printer (mobile, tabletop, print & apply, and more) to the printing system with a push of a button utilizing the existing printer drivers.
- ▶ QuickPrint SAP-integrated inventory software transactions utilize, capture and validate key SAP® software data, and then print barcode labels, documents and/or forms- all in real time.
- ▶ Designed for use with a SAP® GUI PC, tablets and/or mobile computers (ITSmobile).
- ▶ Replace, migrate, or enhance existing SAPscript and Smart Forms printing applications with QuickPrint.
- ▶ “Ease of Use” architecture has been designed for non-technical users.
- ▶ Optimized RF scanning and “Print & Post” functionality can be used to complete the automated solution.

QuickPrint: Quick & Easy Printing for SAP® Software

QuickPrint makes it easy to design, maintain and print and reprint barcode labels from SAP® software. QuickPrint delivers immediate return on investment (ROI), and is designed to allow for integration with: SAP® GUI, SAP® Mobile RF Transactions (ITSmobile) and TranASAP™ (BCCD's optimized SAP® transactions for IM, WM, & EWM). QuickPrint is a centralized, server based solution comprised of the following:

 Printers Thermal, Mobile, Print & Apply	 Server/PC (Windows®) for BarTender®	 SAP® Software SAP S/4HANA® SAP ECC®	 RF Terminal SAP® (ITSmobile)	 Laptop/Tablet SAP® GUI

What's Included with the QuickPrint Package

Printing from SAP® software with QuickPrint is considered a “best practice” technology for replacing, migrating, or enhancing SAPscript and Smart Forms embedded printer code template processes for printing barcode labels. The BarTender® portion of the QuickPrint system allows BCCD to utilize one piece of software to design and generate all of the barcode labels, documents and forms, at all of the company's facilities, that are generated and printed from the SAP® software.

1. QuickPrint >

-  **PO Receipt Label** Print barcode labels to identify received inventory (MIGO MT101), such as Raw Materials, Finished Goods, and Packaging or Consumable Materials.
-  **Adhoc-Inv. Label** On-demand printing of barcode labels to identify existing inventory items with a barcode label that is missing, unreadable or damaged.
-  **Stock Inq. Label** On-demand printing of barcode labels for inventory material resident to specific location (LS33/MB52).
-  **HU Pick Label** Printing Handling Unit (HU) GS1/SSCC barcode labels associated with Picking and Packing (LT11/12 MT601), including Pallet and/or Case labels.
-  **Delivery Label** Printing barcode labels associated with Outbound Deliveries (VL02N) and Shipping, including Pallet and/or Case labels.
-  **Quality Label** Print Quality Inspection (MB1B) barcode labels with identification markers such as Color Differentiation (Green/Red), Graphics, and/or Text

BCC Distribution, Inc. (BCCD) is a SAP-certified software developer and data collection solutions provider. BCCD integrates radio frequency (RF) scanning and data capture, enterprise printing automation, and radio frequency identification (RFID) with a company's SAP® software, to give customers world class functionality. Combine QuickPrint with any of BCCD's 200+ TranASAP RF/RFID scanning transactions utilizing ITSmobile, Console, Fiori, or Store & Forward (online/offline) for a complete, native barcoding SAP® solution.
